## Pads & Fixed Attenuators

---

### Introduction

MDL offers compact attenuator pads having excellent electrical characteristics. They are particularly useful where space is a critical factor.

These units, in EIA waveguide sizes WR28 through WR90, span the frequency range from 8.5-37.0 GHz with attenuation from 10 to 50 dB. As shown, these attenuator pads are available as elements which can be inserted into a waveguide, or they can be built into a length of waveguide with choke or cover flanges on either end.

When using choke flanges, add the thickness of the flanges to the overall dimensions. Check with factory for final dimensions

### Material and Finish

Code	Material	Finish
C	Aluminum Alloy	Chromated
D	Copper Alloy	Silver Plated
E	Aluminum Alloy	Chromated and Painted Blue
F	Copper Alloy	Silver Plated and Painted Blue

### Attenuation

Number indicates fixed attenuation setting in dB

### Pressurized for 20PSIG.

Number indicates desired pressure

For non-pressurized, omit numerals and "P".

## Sidewall Fixed Attenuators

MDL series of sidewall fixed attenuators have the size and reliability of the sidewall variable attenuators. Modifications of these models are available to meet special customer requirements.
